

SHARK - Water tight gel insulated joints

SHARK[®]
GEL INSULATED JOINTS

SHARK 506W

Gel insulated straight through joint for steel wire armoured or unarmoured PVC, XLPE, EPR cables 0,61 kV up to five cores from 1,5 to 6mm²

SHARK 525W

Gel insulated straight through joint for steel wire armoured or unarmoured PVC, XLPE, EPR cables 0,61 kV up to four cores from 6 to 16mm²

The kits contains: gel insulated joint, five core terminal block, allen key, armour bond kit with constant force roll springs and earth braid, complete with cable retention clamps.

SH 0325 - *smart* SHARK

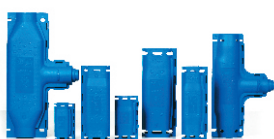

Gel insulated watertight joint with 3 pole 6 amp terminal block.

SH 0310 - *smart* SHARK

Gel insulated watertight joint with 3 pole 13 amp terminal block.

SH 0316 - *smart* SHARK

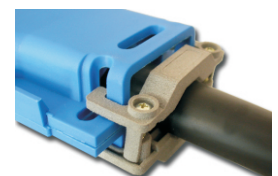

Gel insulated watertight joint with 3 pole 30 amp terminal block.

IN ACCORDANCE WITH EN 50393

ADVANTAGES

- Re-enterable
- No mixing and casting resins
- Fast and easy installation
- Reduced numbers of tools needed
- Inert and non-toxic materials
- No shelf life

Clamp mounted with cable
